

Our Medical Gas Control Panels are designed to update and convert your old Gas Control Panels.

The Retro-Fit process allows you to update and convert your old Medical Gas Control Panel to a new Amico Gas Control Panel. This can be done without cutting the pipeline or breaking into the existing wall. Amico's Retro-Fits are designed to use the existing back box of the previous product. This allows you to maintain the original configuration, while improving both the functionality and aesthetic appearance of your Gas Control Panel.
